

## Commentary

Scott Lawson

### Welcome to our first publication of 2016.

Well, it's hard to believe, but we are already well into the second month of the New Year. It seems a reoccurring theme this year that a good deal of people skipped over the traditional 3-week Christmas break and either worked through completely or came back in the first week of January. The overall message is that the market is buoyant; certainly in the construction sector, projects can't and won't wait for the traditional holiday break.

### Halon

As we go to press, our second shipment of halon is about to depart for approved destruction with A-Gas in Australia. I would like to acknowledge the hard work of a number of FPANZ members in securing halon from around the country from building owners and the public. Special thanks also go to John Fraser and Ian Makgill for being the driving force behind the halon recovery project. We are still looking for additional halon that can be removed from sites and/or recovered from the public. We would be very grateful if all FPANZ members could increase their efforts to seek out these extinguishers and gas flooding systems. This is the last chance for subsidised safe disposal of Halon; let's not waste the opportunity. The age and condition of the recovered units we have seen so far validates our view that there is significant risk to the public and the environment unless we recover these old units. We owe it to future generations to recover as much of this ozone-damaging product as we can and to do it safely.

### CFAC

We have also completed the annual revalidation of certified Fire Alarm Contractors. This year, we plan to work on a new model that will reduce the amount of paperwork to retain the certification annually. We also plan on working to improve awareness of the CFAC certification in the market place and with builders, council bodies and end users to highlight the additional processes CFAC companies have in place. The process to become certified is not overly onerous, and we are happy to work with our members should any companies wish to attain CFAC certification. We will be asking existing CFAC companies for input later in the year to assist with the redevelopment of the certification and the criteria to attain and retain CFAC certification.

### Members' Fishing Day

We have locked in Thursday 31 March for the next members' networking fishing day. Previous days have proven an opportunity for both great networking and great fishing. We have again booked with the Kiwi Angler, who always put us on the fish and has a great setup. This day has been well received in the past and places fill up quickly, so please fill in the registration form on page 5 or contact Amelia to secure your spot. We look forward to seeing you on the day.

### Fire Alarm Detection Register

We are well along the path of the annual revalidation of the Fire Alarm Detection Register. We are just waiting for the final few suppliers to update their listing, and we will be publishing revision 5, issue 1. This will incorporate all the latest approvals and corrections. We are also working on a new section that will be published and used in conjunction with the current revision of the register; this will be updated every time a new product is evaluated and approved prior to a formal issue of the register being updated. This will make it easier for inspectorates to quickly validate approved products between issues and for suppliers to speed up product entry to the market. We are also exploring different methods for the management and distribution of the register, including online real-time access.

### FireNZ 2016

A reminder: we have secured the ASB Showgrounds in Greenlane for this year's conference (9–11 November 2016). We will publish more details as we complete work on the programme; however, plans are well underway, and we are working on it being even bigger

and better than last year's event in Wellington. Keep an eye out for the extended programme in coming months. Remember also that photos from FireNZ 2015 can be found on [Facebook](#) 📷 and the presentations can be found [here](#). 📄

Scott Lawson  
Executive Director, FPANZ

## *In Memory* **Joseph Edward Rose**

11th October 1953 – 31st December 2015

Over the holiday break, we received some sad news about one of FPA's lifetime members. Sadly, Joe passed away on 31 December 2015.

Joe was a very colourful character who was well-known in the fire protection industry. Those of you, myself included, who worked with Joe during his many years in the industry will know how passionate he was about the fire protection industry.

Joe made a considerable contribution to the industry and the FPA, and he was a strong advocate for a number of industry causes. One in particular that was dear to his heart was training and bringing new people into the industry and sharing his knowledge.

A great many of us benefited from Joe's passion and knowledge over the years, and he will be sadly missed. I speak on behalf of a good number of you that we all express our sympathy and support to Joe's family.

Scott Lawson

## COMPETENCY BASED ASSESSMENT

- For those who have been in the industry for 5 - 7 years ▪
- All Installers, Testers, Inspectors of Fire Alarms, Sprinklers, Hand Operated & Passive Systems ▪
- Helps you to get **IQP** status ▪

**COULD THIS BE YOU? APPLY NOW. GET QUALIFIED.**

Contact Liza 09 448 0434 or Jim 021 560 161 | Freephone 0800 FIRETECH | email [admin@firetech.co.nz](mailto:admin@firetech.co.nz)

## Passive Group Update - Author **Ron Green** - Passive Group Chair

I hope 2016 has started well for you and you are taking advantage of the awesome weather. On the Passive front it should be a productive year as there is a myriad things happening as identified below.

### Training

At our first PASSIVE SIG meeting we will be planning the first of hopefully many training workshops that will include attendees actually installing some fire stopping of typical cable, conduit and metal pipe penetrations. There will of course be some theory stuff and a video or two to keep people engaged. If you are an installer and have to fire stop your own penetrations then you need to register your interest with FPA as we are anticipating a sell out for the first trial run.

If you are a supplier of passive systems with solutions for cables, cable trays and metal pipe then please contact FPA to register your interest in being involved.

### Passive Guide

As previously mentioned BRANZ are working on a Passive Guide with input from FPA which is planned to be ready for later in the year. It will cover various aspects including why passive needs to be planned and many of the dos and don'ts of Passive Fire Protection. It will certainly cover a wide range of knowledge that will assist many who are involved from the start to the end.

### MBIE Building Performance Review

As part of the 14 areas MBIE are reviewing, Passive Fire Protection is one of them. This year will see the commencement of that review along with construction monitoring which go hand in hand with Passive Fire Protection installed systems.

This year I thought for every newsletter it would be a good idea to have an educational Tip to help those involved in the Passive scene. The language I will use will be basic as terminology can be confusing just like in any trade.

## Passive Tip #1 **PLANNING.**

We have all heard the old saying "By failing to prepare, you are preparing to fail." – Benjamin Franklin.

This is so true for many aspects of life, however when it comes to trying to fire stop some cables, conduit and pipe at the end of a job it can be nearly impossible or very costly.

If you are a contractor that is required to do some fire stopping for the services you have installed, here are some questions you need to ask yourself (this list is not exhaustive):

1. What is the Fire Resistance Rating (FRR) requirements – this is important as the sealants you are proposing may not achieve the required insulating rating (temperature of heat allowed to be transferred from fire side to non-fire side of wall / floor) / or may need additional product to be added for the cables or metal pipe
2. What substrate will you be installing services through e.g. concrete, Plasterboard etc. This is important as some sealants / collars are only tested in concrete! Therefore you may need to use a different system or manufacturer.
3. What is the depth / how many layers of plasterboard and what type of plasterboard? This is important as the system you are wanting to use may not be suitable or you may need another layer of plasterboard to achieve the correct depth which you may have to pay for!

4. What are the requirements for the substrates e.g. depth, thickness, size of gaps around services (annular gap) in order to fire stop the services as per the manufacturers tested requirements. This is important as the hole in the concrete may not have enough room for the required amount of sealant.
5. Is the sealant you are using tested for cables? If so how many cables? This is important as you may be using a sealant that is only tested for gaps! This is a costly mistake.
6. If you are planning to install cables, conduit and metal pipe in the same penetration make sure your system is tested for multiple penetrations as many are not!
7. Advise the builder in writing that any penetrations you make and subsequent fire stopping you complete is not allowed to be used by other trades. Any damage to your fire stopping will incur additional costs and the services have to be removed.
8. Take photos of your finished work as you progress, with a date stamp on the photo and e-mail them to the builder for his records
9. I recommend you get to know two or three different products which provides options if one supplier runs out of stock and for situations where one supplier may not have a tested system for a particular penetration
10. Do not leave the planning to the end as it can often be too late

These are just a few tips for planning! Happy fire stopping! – Ron Green

### HOFFE Group Update

- Author **Lance Hunt** - HOFFE Group Chair

Hello to all and I trust everyone had a Safe Christmas and New Year break.

With the major challenge of 2015 for this group been the Hand operated firefighting equipment survey data accomplished we look forward on reporting monthly and also releasing articles in regard to the progression of this critical project, look out for an update article in March publication of the Fire and Security Magazine.

The group's next focus is completing our Code of Practice for both the Hand operated firefighting equipment service contractors and the product importers, this review is underway and I encourage anyone who is interested to make contact with me, note our first Special Interest Group meeting is on the 15th February at the New Zealand Fire Service Headquarters on Pitt Street start time 9am.

NZS4503:2005 will also be reviewed this year so we will be looking for interested parties to get involved, it would be great

to get some new faces involved with this Special interest Group this year, regards Lance Hunt HOFFE SIG Chair.

A reminder for the HOFFE members who are involved/interested in the importers and service contractor's code of practise meeting scheduled for the 3rd of March 8am at FPANZ offices. We will be doing a final review of the existing drafts and it is essential we have industry participation please RSVP to Lance and Amelia we will send out draft minutes and a reminder next week.

Regards,

**Lance Hunt,**  
HOFFE SIG Chair

## Need more leads, but no money available for sales and marketing? *No problem.*

**I can find you an additional \$10K in new business this month, and every month going forward. And at *no charge*.**

**My name is Bruce Ross. I'm a Business Growth Strategist.** I work with small and medium-sized businesses that have little to no money to spend on marketing.

I can show you how to generate all the leads you can possibly handle.

Best of all, the strategies I teach you will continue to work for you month after month as long as you're in business.

If you will invest just 45 minutes with me, I promise that I will find you at least \$10,000 in additional revenue that you can begin to put in your pocket **THIS** month... and *every* month moving forward.

We can do this 45 minute session over the phone... and I promise during the time we're together that I won't try to sell you a thing.

*But there is one catch!* I'm writing a book detailing the strategies I use to find \$10,000 for any small business owner, and my publisher has told me I need more case studies.

All I ask is that you allow me to document your results and use them in my book, either under your real name or anonymously.

If you're interested in making an additional \$10,000 beginning this month... and every month for the rest of your life as a business owner, contact me... and we'll schedule a meeting at your convenience.

- Make an additional \$10,000 a month without spending money on marketing
- Just one **FREE** 45 minute session in person or over the phone

**Phone Bruce on 0800 548 900  
or email: [bruce@ignitebusiness.co.nz](mailto:bruce@ignitebusiness.co.nz)**

## FPANZ Team-Up Calendar

We now have a great new online calendar system for keeping an eye on events that are relevant to our industry and FPANZ.

This can be accessed a number of ways, from our website, or from the link below, or you can even subscribe to the ical links below and your own calendar will be updated with the events and changes if you subscribe to them.

Presently we have four calendars the web address to view them online is:

## CCA SEMINAR 2016

This 1.5 hour presentation (plus time for questions) will provide practical, easy-to-follow advice about what you need to do under the Construction Contracts Act 2002 to give yourself the best possible chance of being paid what you are owed on time, how to prepare for an adjudication and how it works, and new provisions brought in under the 2015 Amendment Act covering retentions and professionals.

This presentation will be of significant practical benefit to anyone involved in the construction industry, whether it be on-site or dealing with administration in the office, and regardless of the size of your business or your level of experience within the industry.

There are 3 modules which incorporate an update on the important amendments that came into effect on 1 December 2015 and further amendments that will come into force later in 2016 and 2017.

- **Module 1**

Regulates payments made under construction contracts, including the requirements for issuing valid payment claims and payment schedules;

- **Module 2**

Sets out procedures for the adjudication of construction disputes and the recovery of overdue payments under construction contracts;

- **Module 3**

New provisions covering retentions and the application of the Act to professionals.

Registration fees include a comprehensive written paper available to download after the presentation from the Specialist Trade Contractor's Federation website.

The seminar will be followed by a Cash Bar at the seminar venues.

## REGISTRATION

**\$100 per person** inclusive of GST. Places are limited.

Entry is by ticket only. Complete the attached registration form and return by email to [office.nzstcf@gmail.com](mailto:office.nzstcf@gmail.com) or post to PO Box 39120, Lower Hutt, 5045

Registration will be confirmed on receipt of payment.  
Other inquiries please phone **0800 724 686**

## SPEAKERS

**Andrew Hazelton**  
PARTNER

Hazelton Law  
[www.hazelton.co.nz](http://www.hazelton.co.nz)

**Rachel Conner**  
ASSOCIATE

Andrew is well known in the construction industry in New Zealand. He has been Honorary Solicitor for the New Zealand Specialist Trades Federation for 15 years. He has represented many different parties in the industry from subcontractors to main contractors, professionals and owners. Andrew was a member of the Chartered Professional Engineer's Council for 12 years and regularly sits as an adjudicator under the Act.

Rachel has appeared for clients in a number of construction disputes in adjudications, and both the District and High Courts. She has undertaken enforcement proceedings against debtors including obtaining charging orders and liquidation proceedings and has experience in assisting clients in preparing valid payment claims and schedules, and in drafting conditions of contract for a number of specialist subcontractors.

# CLAIMS

## MANAGING YOUR WORKPLACE ACC CLAIMS WHEN THEY HAPPEN

Requests from our clients for assistance with ACC workplace claims has seen Manage Company develop a new on-line toolkit for managing workplace injuries when they happen.

The on-line toolkit which operates under the ManageCLAIMS brand provides tips, templates, guidance, factsheets and the support you need when lodging a claim with ACC. It allows the employer to manage the employee, manage ACC and ultimately manage their ACC levy penalties. It provides the tools, forms and tips on how to control the doctor and speed up the whole process by over 40%.

Martin Wouters (Managing Director and Designer of the Toolkit) says one of the aims for business should be to avoid a medical certificate which says "fully unfit for work" where possible and the toolkit provides a very useful way of managing this process. The key areas of focus are:- Prior to an injury happening, At the time of injury, Communication, Pay and Return to work.

Our job is to keep it up-to-date and compliant and we also provide a support function so employers can ask the curly questions.

**The toolkit is available to FPA members at an introductory price of \$249 + GST per year. Please go to [www.workrisk.co.nz/claims](http://www.workrisk.co.nz/claims) to sign up using promo code CLAIMS to save yourself \$100! (offer only available until 31<sup>st</sup> October 2015)**

# Calling all Halon Fire Extinguisher Owners

FPANZ is promoting awareness around Halon fire extinguishers and wants to recover these from the commercial sector and from private owners.

Halon has fallen out of favour due to its environmental impact and long atmospheric life time. It is considered to be a potent greenhouse gas and contributes to ozone depletion. However, safety is the main issue as servicing of Halon extinguishers has not been available since 1998 when the production of Halon was banned under the Montreal Protocol.

Over the previous ten years, more than 60 tonne of Halon has been recovered by FPANZ members and this was sent for safe destruction. It is estimated that a further five to ten tonne is still in use. This needs to be recovered now as any unit still in use will be well over ten years old and will not have been serviced.

"Fire extinguishers, just like smoke detectors, need to be checked by a certified agent annually" says Blind

"We do have fears that Halon extinguishers, due to this lack of servicing, may fail to operate correctly in the event of a fire. We are prompting all members of the public to check their boats, cars, workshops, caravans and planes to see if they still have a yellow Halon extinguisher and to exchange this for a unit coloured red".

"There will be a cost to change, however both the public and the environment will benefit as we can be sure new systems will operate correctly in event of a fire and the impact on the ozone layer will also be reduced" says Blind.

There are now many suitable and cleaner alternatives available and FPANZ members located nationwide will accept Halon units and provide information on the safer alternatives available. Halon extinguishers are easy to identify as they are bright yellow. Replacement units will be coloured red.

"We look forward to gathering as many of the remaining Halon systems and hand held fire extinguishers here in New Zealand and to have the contents safely destroyed" says Blind.

"We will also have greater confidence that owners will be protected in the event of a fire and this will ultimately protect lives".

Our message is: **"Be Safe Yellow is Out – Red is In!"**

For further information check the FPANZ website for a certified agent near you:

<http://www.fireprotection.org.nz/>

**Yellow extinguishers, Halon extinguishers, are so old – if you have one, the chances are they will let you or your family down in a fire.**

Halon damages the ozone layer which in turn can affect our health, causing skin cancer, cataracts and other illness as well. Damaging the ozone layer can also impact on our weather, our soil and our crops.

Protect yourself, your family or business, by handing in your old yellow extinguisher. It's easy to do – simply take it to the nearest local approved Fire Extinguisher Service Agent. A list can be found at [www.fireprotection.org.nz](http://www.fireprotection.org.nz)

While there, talk to these experts about your needs and how best to protect against fire, including alternatives such as a red fire extinguisher\*, a fire blanket, a smoke alarm, and other effective choices. Often a combination is the best approach.

**So act now and hand in your old yellow extinguisher.** It's a service for the general public and small businesses. A small recovery charge will be set at \$10 per kilogram (up to a maximum extinguisher weight of 2.1 kg in size). A Halon extinguisher larger than 2.1kg is considered a commercial size and will be disposed of at a quoted rate.

*\*There is more than one type of red fire extinguisher on the market. Ask which one best suits your needs.*

**For more information**

call FPANZ on 09 414 4450 or visit us at [www.fireprotection.org.nz](http://www.fireprotection.org.nz)

## Fire Research & Investigation Unit

# Heads Up

### BACKGROUND

Investigations into the two separate fires have highlighted similar issues. Both buildings were consented as commercial premises and had been unlawfully converted to accommodate residential occupants.

The first fire occurred at a building being operated as a car mechanical workshop and a car dismantler on the ground level with sleeping accommodation on the upper level. No automatic fire alarm system was provided in either of the ground floor tenancies. Since the original consent for a factory in 1981, there was no record of any consented work being done. A recommendation that a notice to fix be issued was on file however there was no evidence that one had been issued to the building owner.

The second incident involved a building originally built in the early 1900s, and subject to multiple alterations and extensions over time, the latest in 2001. However, none of the consented works included the conversion to residential use. The building included a single storey workshop adjoined to a two-storey commercial unit. Occupants of both the workshop and upper level of the commercial unit had converted these spaces to permanent accommodation. The workshop was fitted with automatic detection, but the rest of the building was only provided with manual call points. The use of the building as residential premises was also in breach of the district plan for the area. The Territorial Authority had issued several notices to the building owner, including two Dangerous Building Notices, listing necessary remediation works which had only been partially completed. Therefore the notices remained valid at the time of the fire.

Figure 1 - Second Incident: Rear facade of commercial unit overlooking the burnt out workshop

### INCIDENTS DETAILS

The fire in the first building occurred on the 9<sup>th</sup> December 2014. The Fire Service was notified at 10.09am. On arriving, firefighters were faced with the car dismantlers premises fully involved in fire with the fire encroaching into the upper level through the roof space. The fire was attended by five fire appliances and was extinguished by 11am. Occupants were able to evacuate safely, in part due to the fire occurring during daytime.

The fire in the second building occurred on the 3<sup>rd</sup> June 2015. The Fire Service was notified at 1.19am and the first responding appliances arrived at 1.26am to find the single-storey building fully involved and the fire spreading to the two-storey structure. The incident was escalated to third alarm, requiring 14 fire appliances and support vehicles before it was finally extinguished at 2.30am. The occupant of the two-storey unit was alerted by the activation of the fire alarm and was able to evacuate safely. Unfortunately, the occupant of the single-storey unit was unable to evacuate and died in the fire.

## FURTHER INFORMATION

In the first building, the walls of the upper level unit were constructed with standard 12.5mm Gib board mechanically fixed to the timber frame. There were a number of penetrations through these walls which had not been fire stopped. Therefore the upper level unit containing the sleeping risk was not adequately fire separated from the ground floor spaces. The structural steel beam supporting the floor did not appear to have any fire protection. Finally, no automatic detection and alarm system was provided. All these features would have been required under the Building Code

In the second building, the upper level unit was not appropriately fire separated from either the ground floor commercial unit or the adjacent single-storey unit. In addition, automatic detection was only provided in the single storey unit. The Building Code would have required both adequate fire separation and automatic smoke detection to protect the sleeping risk.

In both cases, the buildings had been unlawfully converted and were demonstrably dangerous prior to the fires. There is also evidence indicating that in both cases, the Territorial Authorities were aware of the issues, and in at least one of the cases, had taken steps to resolve them, although the situation had been allowed to continue for an extended period of time.

Figure 2 - First Incident: remnants of the wall separating the kitchen of the residential unit from the workshop

## LESSONS LEARNED/RECOMMENDATIONS

The following recommendations are relevant to these incidents:

- Building Consent Authorities (BCAs) and/or Territorial Authorities (TAs) should ensure that recommendations made by compliance officers are given due consideration and notices for remedial works are acted on.
- BCAs/TAs should investigate all non-consented change of use they become aware of, with priority given to those that introduce sleeping accommodation in the premises.
- Designers involved in alterations to existing buildings should undertake sufficient investigation to ascertain existing provisions, particularly fire rating, in order to support design assumptions.
- Where sleeping accommodation is introduced in an existing building, automatic fire detection and alarm systems throughout are essential to ensure the safety of occupants and should therefore be provided as part of the conversion works.
- Adequate fire separation is also critical between sleeping areas and other parts of the building. Where existing partitions do not provide the required fire resistance, they should be replaced/upgraded as required.
- Where possible, the NZFS also recommends that considerations be given to the installation of automatic sprinkler systems to protect occupants and safeguard business continuity.

## FURTHER INFORMATION

## **SAFETY SPOTLIGHT**

- It's a legal requirement to ensure your workers have access to toilets and water on site. This link provides info on the requirement and where to get further information. [👉](#)
- New year – new signage and resources! Now's a great time to replace old H & S resources and add some new ones. The Charter has a range of posters, tool box talks and factsheets to help kick start your H & S efforts in 2016. Check them out [here](#). [👉](#)
- Free Health and Safety Transition Training for H & S reps. This is a one-off, free course delivered through Safety 'n Action in partnership with WorkSafe New Zealand. Transition Training is structured to bridge the gap between the current legislation and the new Health and Safety in Employment Act. It is available free of charge to all existing HSRs trained to at least level one under the current Health and Safety at Work Act. For more info [click here](#). [👉](#)

### **Charter Members Event – SAVE THE DATE.**

The first Charter Members Event for 2016 will be held on Tuesday 1st March 2016. Put it in your diary now – more details in the February newsletter!

## **Graham's View**

2016 is predicted to be one of the 'golden years' for construction. Building and construction activity in NZ will peak at an all-time high of \$37 billion this year (\$8.2b in Canterbury) – effectively ending the most sustained level of growth our industry has experienced in 40 years. According to the National Construction Pipeline Report, we are building more than we have ever before, with the projected peak in 2016 being 30% higher in real terms than the last peak in 2007, and 85 per cent higher than the peak in 1997.

There is no doubt that the sustained increase in expenditure and activity has brought with it an increase in accidents and incidents. However, ACC's Canterbury data dashboard shows claims have reduced or levelled off in a number of areas over the past few months. This is particularly noticeable in two of our previous high-volume claims sectors of residential building and on hire labour. It's too early to label it a trend yet, but I think we can all collectively take some credit – there can be no doubt that our concerted efforts around H & S in Canterbury are having a tangible effect.

The Charter's original intent was to 'compete for business; collaborate for safety'. As constructors, we tend to talk about H & S 'practise' but for me, H & S works when it's about relationships. And I think this has been one of the Charter's greatest successes. It has brought together people with a shared commitment and enabled them to collaborate. Whether through membership of the Steering group or as a representative on one of the working groups; by attending Charter events and workshops; using the assessment tools to help you get a feel for where you should be targeting your efforts, or by welcoming Libi on to your worksite to talk to your team about how they see H & S...the Charter has fostered relationships and partnerships that have enabled H & S to thrive in Canterbury.

**Graham Darlow**  
Charter Steering Group Chair

## **CHARTER NEWS**

### **Health and Safety Solutions for Builders**

Certified Builders and Master Builders are hosting an event for all residential builders to help them get their H & S right. The event is sponsored by ACC, SiteSafe, Carters and ITM.

This FREE breakfast event will help you:

- Understand what the new H & S legislation means for you
- Hear from other small businesses about how they've implemented H & S
- Find out how the Canterbury Rebuild Safety Charter can help your business grow its H & S capability
- Get free advice and resources from a range of professionals (including WorkSafe NZ, ACC, Site Safe, IT solutions, legal reps and trade suppliers)

For more information or to register: see the events section of this update.

## CHARTER NEWS

### Congratulations to our 2015 Charter Champions!

The inaugural Charter Champions were announced at the December Canterbury Rebuild Safety Charter event. Mayor of Christchurch, Hon. Lianne Dalziel, presented pins and certificates to 13 rebuild workers and site supervisors. The Charter Champion Awards celebrate and recognise leadership and commitment to H & S. Well done to you all!

If you have a H & S Champion on your site, **nominate them here.**

## Website Updates

There's lots of new 'stuff' happening on the website ahead of its revamp (hopefully we'll be ready to 'launch' in March!). The following links and info have recently been added:

- You can find out about the new regulations around working with asbestos, which come into being on 4 April 2016. These new rules will affect asbestos removal companies, Certificate of Competence holders, builders and other tradespeople who work with asbestos. Check them out **here.**
- A new banner has been added to the home page of the Charter website. With just one **click,** you can now access the very latest information on the Health and Safety at Work Act, which comes into effect on 4 April 2016.
- Updates on scaffolding and edge protection: **Click here.**
- Why not get involved in testing the new Charter website? The website is currently being built and will go out for testing soon. We would welcome Charter members

feedback on the beta site. Those interested in providing feedback who are not on the Charter Steering Group or Working Groups, please contact the Charter on [info@safetycharter.org.nz](mailto:info@safetycharter.org.nz) to be involved.

## CHARTER NEWS

### Beat Fatigue

In December 2015, WorkSafe New Zealand and ACC teamed up to beat fatigue on Canterbury worksites. Inspectors and Injury Prevention staff visited 45 worksites, delivering food, water and tool box talks.

Fatigue is a serious issue in the construction industry. It increases the chance of injuries occurring and reduces performance and productivity. And while most of us have enjoyed a few weeks away from work, there's still some long hours to be worked in hot, dry conditions – which will increase the risk of fatigue.

**The 'Beat Fatigue' campaign** 🖱️ aims to help construction workers understand the effects of fatigue and what they can do to avoid it. Everyone has a responsibility to manage fatigue, but often people don't know where to start – what is it, what do I have to do, how can I help

**Keep yourself & others safe.  
Avoid fatigue.**

**EAT**  
(three good meals a day)

**SLEEP**  
(you'll need 7 to 9 hours a night)

**HYDRATE**  
(drink water regularly)

**WORKSAFE**  
NEW ZEALAND | HAKI KAHORI  
HAKI KAHORI

my team manage the risks? The Beat Fatigue campaign offers employers and workers simple, practical advice and information on managing fatigue. The simple act of having a conversation about fatigue can really make a difference.

WorkSafe and ACC will be running the fatigue campaign February. If you would like a site visit, just get in touch! Donna.Burt@worksafe.govt.nz

### Dust Campaign

The Canterbury Rebuild Safety Forum has developed resources to help constructors understand and manage the risks associated with dust.

Most people are aware of the dangers of dust from asbestos or silica, but what most people don't realise is that dust in ALL forms can be potentially dangerous to workers' health.

You can click here to access a series of toolbox talks that highlight the health effects of dust and how to mitigate and manage it on site.

Click below to view toolbox talks for your teams:

1. **Health effects of working with dust in construction** 🖱️
2. **Dust on construction sites needs to be managed** 🖱️
3. **Dust: it's not just a nuisance, it can seriously damage your health** 🖱️

## WELCOME ABOARD

A warm welcome to our newest 'batch' of Charter signatories:

## ACC Data Update

New construction-related claims in Canterbury remained static in December. We received 554 claims; the same number for November 2015. Those claims that become entitlement claims – that is where a person requires more than 5 days off work – fell slightly from those recorded in November (83.4 in Dec; 85.6 in Nov). The average cost of claims in the first 12 months post-injury rose slightly - up from \$1884 to \$1911.

The number of claims coming from previous 'growth' sectors – namely residential building and On Hire labour supply services - have been in decline now for the past four months. Residential building however still generates the highest volume of claims by industry group – averaging over 140 per month. The next highest volume of claims by industry sector comes from non-residential building construction.

**Click here** to read the December 2015 dashboard. 

**Number of new construction claims (12 months moving average) in Christchurch & NZ: Jan 2008 - December 2015**

**Number of new construction claims (12 months moving average) in Christchurch by industrial subgroup: Dec 2007 - Dec 2015**

## JOIN THE SAFETY CHARTER.

**We are asking FPANZ members to help us continue to build on the number of signatories committed to the Charter.**

The Charter has a full work programme and more resources will be available this year to support signatories to improve their Charter performance.

Have a look at the website – [www.safetycharter.org.nz](http://www.safetycharter.org.nz) – and join us and the more than 180 rebuild organisations that have signed or endorsed the Charter so far. Contact [info@safetycharter.org.nz](mailto:info@safetycharter.org.nz) for more information.

**Graham Darlow**  
Chair, Canterbury Rebuild Safety Charter

### WHY SIGN UP TO THE SAFETY CHARTER?

The Canterbury Rebuild Safety Charter is an agreement on health and safety between the leaders of a number of government organisations and companies leading the rebuild

**The aim is simple – to get every worker home safely every night.**

We strongly urge you to sign up to the Charter, because you will:

- ✓ **Improve the health, safety and wellbeing** of your workforce, your colleagues and the industry as a whole
- ✓ **Receive support from industry colleagues** to help improve on-site safety
- ✓ **Receive practical ideas, case studies and lessons** to help your company and sub-contractors
- ✓ **Have access to Safety Charter events** featuring key speakers and players in the industry
- ✓ **Use the Charter Assessment tool** with its detailed guide and aggregated results of Charter signatories
- ✓ **Make a public commitment to health and safety**
- ✓ **Boost the reputation of your business** through your commitment to the Charter.

**We're working together to create a legacy of a safe and healthy rebuild.**

# Fire Safety isn't something you would take a gamble on, is it?

Next time you need advice, servicing, installation, or fire protection products, there's a simple way to ensure you are dealing with professionals with the relevant training, knowledge, ethics and responsibility critical to the safety of lives and the protection of property.

The way to ensure you are not taking an unnecessary gamble with lives, property, or fire safety is to **choose a member of the Fire Protection Association of New Zealand**.

**FPANZ members are proud to belong to an Association which:**

- Sets the standards for the Fire Safety Industry in New Zealand
- Ensures its members operate to professional Codes of Practice and Ethical Conduct
- Pursues continuous professional development for members and their staff
- Has established high-level formal relationships with the New Zealand Fire Service, Government agencies, International Fire Associations and the wider community
- Is active in the ongoing development and review of Fire Codes and Standards.

The Fire Protection Association of New Zealand (FPANZ) is a not-for-profit Incorporated Society governed by a constitution and Board of Directors, with its national head office based in Auckland. The Association is the voice of the industry and responsible for these key areas in the industry:

## **Code of Ethical Conduct**

Under the Association's constitution, all members and companies are bound to the Code of Ethical Conduct. Our members are committed to operating to best practice, and are accountable to the Association for their performance. All members are subject to a fully-documented complaints and disciplinary procedure.

## **Vetting**

All prospective new members of FPANZ must supply detailed information on their company, staff and market activities, including customer references. Additional background checks are also done, then all information is reviewed by the Board of Directors to establish that the applicant meets the requirements to become a member of FPANZ.

## **Insurance**

One of the other benefits of dealing with a member of FPANZ is that all members must carry a minimum of two million dollars in public and product liability insurance.

## **Promoting Industry Training and Education**

The Fire Protection Association of New Zealand works closely with key stakeholders: Competenz, FireTech, and its members to ensure the industry is providing continuous industry development and relevant training to staff.

## **Special Interest Groups**

FPANZ Special Interest Groups (SIGs) provide a forum for sub-groups of members to keep abreast of the latest issues affecting their particular discipline, and to ensure that sector-specific issues and concerns are addressed in a timely and professional manner.

*For more information or to confirm if your Service Provider is a FPANZ Member, visit our website [www.fireprotection.org.nz](http://www.fireprotection.org.nz)*

*or contact: Fire Protection Association NZ, Phone: +64 9 414 4450; Email [fpanz@fireprotection.org.nz](mailto:fpanz@fireprotection.org.nz)*

*To make sure you're not leaving it up to a game of chance, ask your service provider if they are a member of the Fire Protection Association of New Zealand.*
